## Overview

RIXML version 2.3.1 is a patch release containing a spelling correction to one of the enumerations.

## Changes

This section itemizes the changes made between version 2.3 and version 2.3.1.

### Region

- Modified the value *Oceana* to *Oceania* in the list of possible values for the *RegionTypeEnum* enumeration governing the *regionType* attribute. The latter is, in fact, the correct spelling.

## Acknowledgements

Thanks to Alan Francis at FactSet for proposing the Oceania region and to James Bartlett at Thomson Reuters for making the correction.
